

SPC Gear GD700 (SPG173)

The **SPC Gear GD700** is an all-new durable, spacious and highly stable desk that provides users with extensive height adjustment and cable management options. The broad and thick tabletop has room for many accessories and peripherals, including XXL mouse pad, full-size keyboard, and even multiple monitors. Convenient rubber grommets greatly help with cable routing, and thanks to the three unique cut-outs on the back of the tabletop, you can even hide away monitor mount arms and any additional cables. Another included feature is a metal headphone holder directly under the tabletop – it can be placed on the left, right, or even the front or side edges of the table.

DESK HEIGHT ADJUSTMENT

The height of the GD700 is manually adjustable through one of four predetermined positions (72, 75, 78 or 80 cm). The selected position is then secured using metal pins which are attached to the steel legs of the desk. This highly ergonomic feature allows users to smoothly and precisely change the height of the desk to match their specific needs.

SPACIOUS TABLETOP

The GD700 is equipped with a tabletop 78 cm thick and 150 cm wide, giving you vast amount of space for all sorts of computer accessories and peripherals. Two or more monitors can be easily mounted in the specialized cut-outs on the rear of the desk, or wherever else users prefer (number of monitors depends on their size measured in inches and type, e.g. ultrawide). Along with this, full-size keyboards, XXL mousepads, speakers, microphones, and much more will have no trouble fitting on this truly spacious desk. With the lack of free space being an issue of the past, you can finally set your workstation up the way you've always wanted it to be.

CONVENIENT CABLE MANAGEMENT

The GD700 has special grommets and hooks for easy and organized cable routing. There are two grommets located at the central part of the tabletop that are secured by rubber plugs, in which any and even all cables can be conveniently hidden away. In addition to this, the steel legs also contain rubberised passages for cables, giving you a professional and even more organized end-look.

CABLE HOOKS

Included with the desk are four self-adhesive hooks that allow cables to be suspended underneath the tabletop. Arranging the cables into a single bundle further aids in convenient setup and organization.

METAL HEADPHONE HANGER

The GD700 comes with a durable metal headphone hanger that can be mounted underneath the tabletop. The hanger is covered in a soft foam,

which protects your headphones and prevents abrasion of the headband cover. This handle can be installed in one of four positions – on the front or side edges, or on the left or right, letting you customize your setup just the way you like it.

METAL POWER STRIP SHELF

Another feature underneath the table is a capacious metal power strip shelf. The shelf has three holes through which power cord plugs can be plugged in. Thanks to the shelf, all cables plugged into the strip will be in one place and not take up valuable floor or desk space.

CUT-OUTS ON THE BACK

At the back of the desk, there are three 5 cm cut-outs. These allow you to install monitor mounts without having to move the desk away from the wall, or even route any leftover cables through. The notches allow monitor mounts to be installed in three different positions – on the left, the right or in the middle of the desk. Thanks to this, you can easily adapt the desk to your desired monitor setup.

FRONT CUT-OUT

The desk has a specially designed wide cut-out at the front. Its gently profiled edge makes it easier to place your arms on the tabletop, and is almost completely imperceptible, even during extended work meetings or gaming sessions.

CARBON AND MATTE COATING

The three-part GD700 top is finished with a durable scratch-resistant veneer. The two outer sections are covered with a carbon-pattern coating, giving the desk a fierce, yet professional look. The inner section is covered in a smoothly textured, equally durable matt veneer.

DURABLE AND ROBUST CONSTRUCTION

The core of the GD700 consists of large steel legs, as well as additional steel reinforcement underneath the tabletop. Rubber feet are installed under the legs to prevent the desk from moving or scratching the floor. Thanks to the wide steel legs, the desk is very stable, and the thick metal beams underneath provide for even further stiffness and support. This specially designed skeleton has made the desk able to withstand loads of up to 80 kg.

SPC Gear GD700 distinctive features:

- adjustable desk height
- spacious tabletop surface
- rubber passages in the legs and top for cables
- adhesive hooks for easy cable management
- durable adjustable metal headphone hanger
- wide metal shelf under the tabletop for power strip and cables

- three cut-outs on the back to hide away monitor mounts or any additional cables
- comfortable cut-out at the front for convenient sitting positions
- durable carbon and matte top coating
- robust construction which can withstand loads up to 80 kg

SPC Gear GD700 technical specifications:

- **Product code:** SPG173
- **EAN:** 5903018664064
- **Colour:** black
- **Desk width [mm]:** 1500
- **Desk depth [mm]:** 780
- **Desk height [mm]:** 720/750/780/800
- **Type of lift mechanism:** manual
- **Desk thickness [mm]:** 18
- **Leg cable routing:** yes
- **Leg material:** steel
- **Tabletop material:** wood (fibreboard)
- **Maximum load [kg]:** 80
- **Warranty (months):** 24

Set includes:

- SPC Gear GD700 desk
- assembly tools
- assembly instructions
