

## **SPC Gear GK650K Omnis Kailh Red RGB Pudding Edition [DE] (SPG129)**

**SPC Gear GK650K Omnis Kailh Red RGB Pudding Edition [DE]** is a full-size mechanical keyboard (with numpad), which will meet the high standards of not only games but also people studying or working at their PC. The keyboard stands out thanks to its solid and compact design with an aluminium top, phenomenal-looking and durable Pudding keycaps made in Double Injection PBT technology, comfortable scroll wheel for volume control and magnetic palm rest. Additional extensive software allows the user to customize the RGB backlighting (including the side strip!) and record macros. All of it makes the GK650K the perfect keyboard for both school, work, and evening leisure with your favourite video game. Kailh Red switches have an ultra-fast response time to keypresses, making them ideal for competitive gaming.

### **Full-sized mechanical keyboard**

The full-format keyboard will prove useful not only for gaming but also for everyday use. Thanks to the numeric keypad, the SPC Gear GK650K allows you to efficiently enter numeric values into office programs, perform quick mathematical calculations or assign additional functions in games. Moreover, each of the 104 keys is individually backlit and the illumination can be adjusted to fit personal preferences and increase the comfort of use in difficult lighting conditions.

### **Modern design**

The design of the SPC Gear GK650K Omnis Kailh Red RGB Pudding is a fusion of classic style with a gaming flair. Its sharply defined edges and contoured aluminium top, paired with a grooved palm rest, perfectly fit into both a gaming setup, and an office environment. Additionally, the keyboard is also equipped with adjustable RGB LED strips on its sides, which further illuminate and visually enrich the workstation.

### **Durable PBT keycaps**

The SPC Gear GK650K Omnis Kailh Red RGB Pudding keyboard is equipped with PBT keycaps made in Double Injection PBT technology. During this process, two colour variations of the PBT material are injected into the mould one after another, thus obtaining the unique two-colour finish and high rigidity. Pudding keycaps enrich the PC setup aesthetically both during the day, and at night. Thanks to their durability, they guarantee high resistance to key wear — even after prolonged use, keycaps retain their unique look, which works (and looks) best with a fully adjustable RGB backlighting.

### **Customisable RGB backlighting**

The configurable RGB backlight gives you almost unlimited possibilities for colour combinations. You can choose from 18 pre-existing illumination styles — from a fixed ambience or a moving pattern such as wave and smooth colour change, to a button-reactive backlight. All effect modifications and settings can be change in the SPC Gear software, allowing you to customise the appearance of your keyboard.

### **High durability**

The GK650K is reinforced from the top with an aluminium plate. This makes the keyboard extremely durable and resistant to deformation — both from rapid

typing and during exciting gaming sessions with your favourite game. It also adds to the device's unique and eye-catching design. Wide rubber feet and the weight of the keyboard ensure stability, increasing the comfort of use.

### **Palm rest**

To improve the ergonomics of the keyboard in the day-to-day use and gaming, the GK650K comes with a palm rest included. Attachment and detachment are extremely easy, thanks to the magnetic fastenings and special grooves in the keyboard's housing. Depending on your needs and preferences, the palm rest can be positioned at any distance from the keyboard — its wide rubber feet ensure that the pad remains stable on the desk. Triangular grooves on top of the palm rest improve ergonomics and enhance the overall look of the keyboard.

### **Volume wheel**

The GK650K features a wide metal scroll wheel for audio level control. Each move is accented with a tactile "bump", allowing you to fine-tune the volume. The roller itself is an incredibly functional accessory — just reach in and change the volume with ease, without having to interrupt whatever you're doing.

### **Kailh Red mechanical switches**

The Kailh Red switches in the GK650K keyboard are designed for the most demanding players. The keys require virtually no force to activate, which greatly shortens response times in FPS and Battle Royale games, where reflexes are of utmost importance. Red switches are also incomparably quieter than Blues, making them ideal for late-night gaming.

### **Detachable cable**

The detachable cable with specially prepared channels on the bottom of the keyboard is also a novelty in the GK650K. This allows it to be placed in one of the three positions or replaced completely, for example for a longer cable.

### **Two-position feet**

The user can adjust not only the appearance (backlighting) of the keyboard, but also its functionality. The GK650K Omnis is equipped with two-position feet that allow you to set the keyboard at three different heights — according to your current needs and preferences.

### **N-Key Rollover**

The N-Key Rollover function in the SPC Gear GK650K equals full anti-ghosting. This means that no matter how many keys are used at the same time, you can be sure your computer will register all of them correctly. This is of utmost importance in games that require complex commands involving multiple keys pressed simultaneously.

### **Functional software**

After installation of the additional software for the GK650K keyboard, the user receives access to a wide range of useful functions. Among others, it allows the user to set the type of RGB backlighting, its colour, operating mode of multiple effects, as well as to create custom profiles. Additionally, the advanced macro wizard provides the player with the option to quickly save under a single key complicated commands that require the combination of several buttons.

## Technical data of SPC Gear GK650K Omnis Kailh Red RGB Pudding Edition [DE]:

- **Product code:** SPG129
- **EAN:** 5903018663319
- **Dimensions (mm):** 453x210x45
- **Weight (g):** 1154
- **Keyboard type:** mechanical
- **Number of keys:** 105
- **Keycaps:** PBT (Pudding)
- **Switch type:** Kailh
- **Switch colour:** Red
- **Lighting type:** RGB
- **Cable length (m):** 1.8
- **Plug:** Gold-plated USB
- **Macros:** Yes
- **Palm rest:** Yes
- **N-Key Rollover:** Full
- **Anti-ghosting:** Full
- **Software:** Yes
- **Warranty (months):** 24

## Set includes:

- GK650K Omnis Kailh Blue RGB Pudding Edition [DE] keyboard
- detachable USB-C cable
- keycap puller
- manual.
